

## MORE ABOUT ELIASON

Further Details of "Dante's" Tragic Death.

## LETTER FROM HIS BROTHER

PITIFUL SCENE WHEN MAGICIAN DIED.

Was Given Every Aid That Loving Friends and Scientific Surgeons Could Bring to Bear—Lingered Some Time in Intense Pain—He Willed Everything to His Wife.

Additional particulars of the tragic death of Oscar Eliasson, the great wizard and one of Utah's most gifted sons, were received in this city yesterday by Paul Hammer, in a letter written at Sydney on Dec. 3. The letter was penned by Frank Eliasson, brother-in-law of Mr. Hammer, and came from Australia by the steamer Vancouver, from which place telegraphic address of the cause and manner of the wizard's death were received by The Herald last Friday.

The letter received yesterday reads as follows:

"It was with unspeakable grief that I am compelled to relate a most lamentable accident, an accident that has lost to the one who was so loved by us but was respected by every one, and has closed a career that in a few years' time would have known no bounds.

The Fatal Hunt.

"It was just a week ago today that Oscar, (Eliasson) Eliasson, Jones, the pianist, and Treseader and myself made up a party to hunt kangaroos and wallabies. We left our hotel at Dubbo, New South Wales, about six miles. After unhooking the horses and turning them loose we all went out, but returned in a few hours for refreshment.

"We again went out in the evening and had all again returned and fired our last shots about nine o'clock. Oscar, who was standing by the side of the horse, suddenly fell and died. I knew it. I knew it. I ran to him and caught him as he was falling down. Oscar had been accidentally shot by Jones. He undid his clothes himself and we found the bullet just under the skin in the center of the abdomen. The bullet had entered just behind the hip, from which blood rushed in torrents.

"The boys immediately rushed to him. The doctor, who was called, found the excitement, came over and found the wound and seeing the trouble, nearly went wild. She, however, soon calmed herself and assisted us to put Oscar into the wagon. We drove with all haste into Dubbo. When we arrived in town we summoned the best doctor to be had. He extracted the bullet and thought it would only be a flesh wound.

Suffered Great Pain.

"Oscar suffered great pain all night, but in the early morning the pain became even more terrible, although morphine was given him. He could not rest. The local doctors now feared that inflammation of the bowels had set in and they started preparations for an operation. He, however, seemed to rally and the operation was postponed.

"The doctor stated that if any entrails were cut as he felt sure was the case, there was the hope that he would stick to the walls on either side, nature growing a gelatine film over as a substitute. All things were in this condition and an operation were performed no good would result and probably a lot of suffering.

"Ten o'clock Sunday, with no improvement, an operation was decided on. There were three doctors, two nurses and myself present. An opening was made just above the groin and a lot of matter taken out. A huge abscess had formed on the entrails, and after carefully examining the track of the bullet the doctors said there was no hope.

"Gauze drains were placed through the abdominal cavity from the wound and we were advised to send to Sydney for Dr. McCormick, supposed to be the best surgeon in the world.

"The special train, due in six hours, was delayed on account of hot boxes, and did not arrive till 10 o'clock Monday night with Dr. McCormick.

"After examining Oscar, Dr. McCormick advised to let the operation go over till morning, as Oscar was feeling easier. At 1 o'clock he was taken again and the operation was made Tuesday morning.

Seemed to Improve.

"After coming from the operation he felt much relieved. It was then we had Oscar make his will, he exclaiming: 'You mean to kill me, don't you? But I am going to live anyway.' The doctors had given him only a few hours to live.

"After this he lived till 2 o'clock Wednesday afternoon. There was no hope of his recovery he said: 'Well, that's too bad, and would not believe it, talking to the very last of continuing the story in a week or so.' 'We had the will drawn up, turning everything over to his wife. He said it was all right and that he knew she would provide for him and his little girl. When Verge asked him if he had anything to say he said, 'No, but I think you understand each other perfectly, and that is all that is necessary.' When asked if he desired her to go home, Oscar said he would leave it all to Verge, but thought we ought to continue the story.

"Verge was very hysterical before his death and for some time after, constantly requiring watching. She bore up bravely at the funeral and has done so since.

"Viola Pratt is a constant caller and is a great comfort to Verge.

Made Many Friends.

"Oscar made so many friends in Australia and they are calling all over here to make to render any help. We have baskets full of condolences from all over Australia. It is said there never was a death so universally regretted. It was necessary for an extra carriage to carry the floral offerings to the grave. The street was blocked with people at the funeral. As the hearse passed, everyone from the lowest vagabond to royalty in carriages, respectfully raised their hats and were drawn up in bodies along the line of march to pay their last respects to the beloved Dante."

"When we left Dubbo with the remains to go to Sydney, every shot in the town was fired, and it was necessary for us to go out of the hotel the back way to avoid the crush. At the station the crowd was so great the funeral train was delayed fifteen minutes in leaving, and during the whole trip the ride every station was crowded to see the train that was taking Dante to his last journey.

"Verge does not feel that she can come home until affairs are straightened out. I wish I could divert her mind from the tragic incident. She has eaten nothing yet, but is feeling a trifle cheerful tonight. Ethel went very bitterly and felt the shock keenly at first.

"Well, Paul, I don't know what the foregoing letter is like, but I have done my best. It is the hardest piece of work I have ever done, and may God grant that there will never be another occasion for writing another such letter. Kindly read the letter to father and tell him that everything science and money could do was done to save Oscar."

New Year Ball

at Christensen's, afternoon beginning 4 p. m.; evening, beginning 8:30 p. m.

## NEW SHORT LINE TRAIN

Portland Service Will Be Much Improved.

## NEW EQUIPMENT ORDERED

O. R. & N. MAN HERE FOR A CONFERENCE.

Traffic Manager Campbell Arrives From Portland to Meet Local Short Line Officials About Train Betterments—His Road Will Be Considerably Improved Soon.

Benjamin Campbell of Portland, traffic manager of the Oregon Railway & Navigation company, arrived in town yesterday afternoon and registered at the Knutsford. Mr. Campbell is in town for the purpose of conferring with the local officials of the Oregon Short Line in regard to the details of the operation of the traffic department of the two big connecting lines during 1900. Mr. Campbell is genial and cheerful, and is possessed of a fund of information about railroading and is not afraid of being interviewed.

He said that the passenger traffic between Huntington and the coast had been increased so much by the opening of the Cape Nome gold fields in Alaska, and the development of the Oregon gold and silver mining industries, it has been definitely decided to double the train service between Portland and the coast as soon as the travel in the coming spring months is sufficiently heavy to warrant it. In conjunction with the Oregon Railway & Navigation company has ordered \$300,000 worth of new equipment from the east, to consist of baggage and mail cars, chair cars, day coaches and dining cars, the contract calling for its delivery early in the year, about March or April. This train will leave Portland in the morning and connect at Huntington with the Oregon Short Line train that will be put on to meet it.

A large amount of money has been expended by the Oregon Railway & Navigation company in the past year in improving the rolling stock, straightening out the road between Portland and Dallas, and replacing the old fifty-six-pound rails with new steel eighty-pounders. Oregon industries are booming, and the growth of the lumber business is growing to such vast proportions that the problem of getting the goods to market is becoming a somewhat serious one.

## ADVERTISE UTAH.

New Year's Herald in wrapper ready for mailing at Herald office. Price, 5 cents; domestic postage, 4 cents; foreign postage, 8 cents.

## NEW DEPOT READY.

Better Accommodations For Kaysville People.

(Special Correspondence.) Kaysville, Dec. 31.—The new Oregon Short Line depot building is now completed and ready for occupancy. The building has received an order from Superintendent J. H. Young, directing him to vacate his present quarters and open the new building for business. The building is a fine structure, built of brick and concrete, and is a great improvement over the old depot.

The building stands at the southwest corner of Main and First streets, one block east of the present depot. In the north end of the building is the waiting room and ticket window. The building is a fine structure, built of brick and concrete, and is a great improvement over the old depot.

The building is a fine structure, built of brick and concrete, and is a great improvement over the old depot. It is a neat and convenient building, 50x100 feet in size, finished in stained glass and shining outside. An opening was made just above the groin and a lot of matter taken out. A huge abscess had formed on the entrails, and after carefully examining the track of the bullet the doctors said there was no hope.

A huge abscess had formed on the entrails, and after carefully examining the track of the bullet the doctors said there was no hope.

The building is a fine structure, built of brick and concrete, and is a great improvement over the old depot. It is a neat and convenient building, 50x100 feet in size, finished in stained glass and shining outside. An opening was made just above the groin and a lot of matter taken out. A huge abscess had formed on the entrails, and after carefully examining the track of the bullet the doctors said there was no hope.
